

DEALERCONNECT

Dealer Relationship Management & Auditing Platform

Business Problem Statement

Automotive organizations manage a large network of dealers, dealer contacts, and business relationships. Existing systems often lack governance controls, auditing capabilities, and centralized dealer visibility.

DealerConnect aims to provide a secure Dealer Relationship Management platform with complete audit trails, role-based access, soft delete functionality, and dealer favorites management.

User Story Matrix

ID	Role	User Story	Business Outcome
DC-US-01	Admin	Login securely into the platform	Secure system access
DC-US-02	Admin	Create and manage dealers	Centralized dealer management
DC-US-03	Admin	Create and manage dealer contacts	Relationship tracking
DC-US-04	Admin	Activate/Inactivate dealers	Soft delete governance
DC-US-05	Relationship Manager	Search dealers	Faster dealer lookup
DC-US-06	Relationship Manager	Manage dealer favorites	Personalized access
DC-US-07	Relationship Manager	Filter favorites by category	Improved usability
DC-US-08	Admin	View audit history	Compliance & governance

- Authentication & Authorization
- Dealer Management
- Contact Management
- Favorites Management
- Auditing & Governance
- Angular Dealer Portal

Learning Outcome Mapping

Feature	Angular Concepts	Spring Concepts
Login	Reactive Forms	Spring Security JWT
Dealer Management	CRUD Components	REST APIs & JPA
Favorites	Services & HTTP	Service Layer
Auditing	UI Reporting	JPA Auditing
Security	Guards & Interceptors	JWT & BCrypt

=====

Final Recommendation

These capstone projects collectively provide exposure to enterprise software engineering practices, secure application development, microservices architecture, business workflow implementation, and real-world client presentation scenarios.

The portfolio is suitable for evaluating learner readiness for Full Stack Developer, Software Engineer, Associate Consultant, and Application Developer roles.

Rubric (Applicable to All Capstones)

Evaluation Area	Marks
Business Understanding & Functional Coverage	15
Angular Frontend Development	15
Spring Boot Backend Development	15
Security & Authentication	10
Database Design & Data Management	10
Business Logic & Workflow Implementation	10
API Integration & Exception Handling	5
Testing & Quality Assurance	5
Documentation & Architecture Artifacts	5
Code Quality & Best Practices	5
Final Presentation & Technical VIVA	5
Total	100

Common Deliverables

Every team must submit:

- Angular Source Code
- Spring Boot Source Code
- Database Scripts
- ER Diagram
- Architecture Diagram
- API Documentation
- Postman Collection
- Test Cases
- Deployment Guide
- Project Demonstration
